

## **Multimedia Production Illustrator CS3**

Design your dream room.

**Part I.** Create a black and white line drawing that shows the dimensions, design, fixtures, infrastructure, and basic furnishing of your “dream room”. The design must fit on an 8 \_ x 11 page of paper, so your file would normally be 8 x 10 inches in size. Adjust the line stroke for different elements like walls, cabinets, fixtures, and appliances. Label each element of your design, using lines with arrows when needed. Use dashed lines for hidden elements like beams, and to show how fixtures are controlled. Include a table that explains any symbols you use, like light switches, electrical outlets, networking, etc. Refer to the examples in the Dream Room file on the Big Mac server. Suggested scale: 1/4 inch on the drawing equals one foot.

**Part II.** Using the tools and coloration features of Illustrator, draw a view of your dream room, most likely viewed from the main entry door.
